** Note - It shall be mandatory to record the energy supplied separately for each category of consumers which is being provided a separate rate of subsidy in the tariff, by the state government, so that the subsidy due for the electricity distribution company is quarterly calculated by multiplying the energy supplied to each of such category of consumers by the applicable rate of subsidy notified by the state government.

**Note-In some of the divisions collection efficiency is the more than 100% which resulted in -Ve AT&C Losses

APCPDCL is considering PTR LV's in 220/132/33KV substations as Transco-Discom boundary points. Discom Input will be arrived through MRI data collected at Transco-Discom boundary points. MRI data directly gives the Gross discom drawls after deducting export energy from the import energy duly considering the MF value. Hence export energy is shown as "0" at T-D boundary points. However OA sales, Auxillary consumption are ashown as export energy for arriving net discom energy drawls. There are no franchise sales with in the discom. Hence sales under part-B are shown as '0'. However energy sold at out side the periphery through exchanges and swap sales are mentioned under part-A.
